

**WHAT:** Visual opportunity of Brush 13 engine, interview about Brush 13 and current fire conditions

**WHEN:** Today, Monday, Dec. 6, 1:00 p.m. – 3:00 p.m.

**WHERE:** Aurora Fire Station 13 (23911 E Arapahoe Rd, Aurora, CO 80016)

**WHO:** Jon Hill, Aurora Fire Rescue Battalion Chief

Aurora Fire Rescue’s Brush 13 apparatus is a newer addition to the fleet and is intended to combat wildfires. Photos of AFR staff utilizing Brush 13 are provided below. The capabilities and purpose will be addressed in more detail by Jon Hill. He will be available at Station 13 for media interviews.

With the recent dry conditions and multiple vegetation fires the city has seen in the recent past, this is a good reminder of how to stay safe during these “Red Flag” warnings.

The Chief and Brush 13 will be in service during these times so the potential for them to have to respond to a call is prevalent.

Please contact AFR PIO at 720-477-0315 with any additional questions or if you are planning to make an appearance at Station 13.
